Also 3 bearn, 3–4 bieren, 4 beern(e, berene, biern(e, byern(e, buirn, buyrn(e, beurn, bourne, borne, 4–5 beryn, buern(e, barn(e, 5 byrne, birn(e, buirn(e. [OE. *beorn*, earlier *biorn* (:—**bern*) 'warrior, hero, man of valour,' hence 'man' pre-eminently, *vir*, ἀνήρ; a word exclusively poetical; of disputed origin. The ME. forms were very varied; the most common midland type in 14th c. was *burn(e*; after 1400 the word was retained chiefly in the north, where it was a favourite term of alliterative poetry; in the form *berne* it survived in Scotch till after 1550. In some of its spellings it was occasionally confounded with forms of BAIRN, and BARON; with the latter it was often actually interchanged: see quots. 1205, 1300.

Phonetically, OE. *beorn* 'man of valour' answers exactly to ON. *bjǫrn*, gen. *bjarnar*, 'bear'(:—OTeut. *bernu-z*, the Celtic representative of which Prof. Rhys sees in the Gaulish proper name *Brennus*); but the ON. word has never the sense of 'warrior,' while the OE. has never that of 'bear.' To this, however, a striking analogy is offered by the case of OE. *eofor*, ON. *jǫfurr* (:—OTeut. *eburo-z* = L. *aper*), which has in Old English only the sense of 'wild boar,' in ON. only that of 'warrior, hero.' The use of the name of a fierce animal as a fig. appellation for 'warrior, brave,' seems very natural, and the fact that OE. *beorn* belonged only to the language of poetry and is never found in prose, suggests that it was a word of which the literal sense was lost, and only a figurative one traditionally retained. Nevertheless some eminent Teutonic scholars doubt the identification. Some have considered the word to be an early variant of *bearn*, BAIRN, or at least a cognate derivative of *beran* to BEAR. Mr. H. Bradley has suggested the possibility of connecting it with the British root of *Beornice* Bernicia, Welsh *bryneich*, and of Welsh *brenhin* king; but the nature of the connexion is not apparent.]

berth (bɜːθ), *sb.* Also 6–7 byrth, 6–9 birth. [A nautical term of uncertain origin: found first in end of 16th c. Most probably a derivative of BEAR *v.* in some of its senses: see esp. sense 37, quot. 1627, which suggests that *berth* is = 'bearing off, room-way made by bearing-off'; cf. also *bear off* in 26 b. The early spellings *byrth*, *birth*, coincide with those of BIRTH '*bearing* of offspring, bringing forth,' but it is very doubtful whether the nautical use can go back to a time when that word had the general sense 'bearing'; it looks more like a new formation on *bear*, without reference to the existing *birth*.

(Of other derivations suggested, an OE. **beorgþ*, **beorhþ* 'protection, defence, shelter' (see BARTH), and Icel. *byrði* 'the board, i.e. side of a ship' (see BERTH *v.*[2]), do not well account for the original sense 'sea-room.' The sense is perhaps better explained by supposing *berth* to be a transposition of north. dial. *breith* = *breadth*; but of this historical evidence is entirely wanting.)]

bet (bɛt), *sb.* Also 7–8 bett. [Of uncertain origin; nor is it clear whether the sb. or the vb. was the starting-point; if the sb., we may perhaps see in it an aphetic form of ABET *sb.* in the sense of 'instigation, encouragement, support, maintaining of a cause': see the quotation from Spenser under ABET *sb.* 2. The vb. would then be derived from the sb., as in the case of WAGER *sb.* and *v.* It is less easy to get from the sense of ABET *v.* to that of BET *v.*, since the original construction ought then to be, not 'to bet money on a champion,' etc., but 'to bet (i.e. abet) a champion with money,' of which no trace is found. See however ABET *v.* 4 in sense of 'to bet that.'

(The suggestion that *bet* is:—early ME. BEOT, 'vow, promise, threat,' has no support in the history or phonology.)]

1. a. The backing of an affirmation or forecast by offering to forfeit, in case of an adverse issue, a sum of money or article of value, to one who by accepting, maintains the opposite, and backs his opinion by a corresponding stipulation; the staking of money or other value on the event of a doubtful issue; a wager; also, the sum of money or article staked. ***an even bet*** (fig.): an equal chance, a balance of probabilities. ***a good bet, best bet*** (fig.) (orig. *U.S.*): a satisfactory choice; the person, thing, or course most likely to succeed. ***my bet is*** (colloq.): = 'I bet', my opinion is.

†bet, *adv.* (and *a.*) *Obs.* Forms: 1–7 bet (3–6 bett, 4–6 bette). [Com. Teut.: OE. *bęt* = OFris. *bet*, OS. *bat*, *bet* (MDu. *bat*, *bet*, Du. *bet-*), OHG., MHG. *baz* (mod.G. *basz*), ON. *betr*, Goth. *batis*:—OTeut. **batiz* adv., the uninflected comparative stem, whence was formed the adj. **batizon-*, in OE. *bętera*, BETTER. In the adv. the comparative ending *-iz* underwent the same phonetic changes as the formative *-iz* of nouns, and was thus reduced to *-e*, or lost entirely before the OE. period. (*Bęt*, for the expected *bęte*, probably followed *lęng*, *sęft*, etc.) About the end of the OE. or beginning of the ME. period, *bet(e)re*, the neuter gender of the adj., began to be used, in certain constructions, in the place of *bet*, and, after a long existence side by side, gradually superseded it about 1600: instances of *bet* just before, and especially after, 1600 are archaisms. This encroachment of *betere*, *beter*, *better* upon *bet* began in phrases where the adj. and adv. are not easily separated, as in *hit is bet* or *betere* (positive 'it is *well*' or '*good*'), and gradually extended to others; the final ascendancy of *better* was doubtless helped by the fact that *bet* and other comparatives of the same type (e.g. *leng*, *near*) had not the ordinary comparative sign, and were thus less definite in expression. As in similar cases, during the time that *bet* and *better* were interchangeable as adverbs, *bet* was by compensation sometimes used for *better* as adjective.]

f. *Physics.* ***beta*** (or *β*) ***radiation***, the second of three types of radiation emitted by radioactive substances, having greater penetrating power than alpha radiation. So ***beta*** (or *β*) ***particle***, ***ray***.

1899 RUTHERFORD in *Phil. Mag.* XLVII. 116 These experiments show that uranium radiation is complex, and that there are present at least two distinct types of radiation—one that is very readily absorbed, which will be termed for convenience the α radiation, and the other of a more penetrative character, which will be termed the β radiation. **1902** RUTHERFORD & GRIER in *Phil. Mag.* IV. 325 For brevity and convenience we will call the non-deviable rays of *all* radioactive substances α *rays* and the deviable rays β *rays*. **1904** RUTHERFORD in *Nature* 10 Mar. 437/1 It is to be expected that Röntgen rays would be set up at the sudden *starting* as well as the sudden stopping of the electron or β particle. **1909** SODDY *Interpr. Radium* 55 In ordinary circumstances radium appears to be expelling both α- and β-particles together. **1922** A. S. EDDINGTON *Theory of Relativity* 19 The β particles shot off from radioactive substances are negative electrons which sometimes attain speeds of 100,000 miles a second. **1933** *Discovery* Feb. 45/1 Beta radiations, which are streams of electrons. **1957** *Technology* Mar. 14/2 Both beta and gamma rays can also be used for gauging thickness or height in the examination, for instance, of red-hot sheets of steel.

Hence denoting a process in which, or a substance from which, beta particles are emitted, as ***beta decay***, ***disintegration***, ***emission***, ***emitter***.

In reality, the change in magnetic susceptibility of α-iron occurring at 768° C. is not associated with any structural transformation and β-iron is no longer recognized as a distinct variety.

h. ***beta rhythm***, ***waves***, fast activity of the brain recorded in an electroencephalogram, having a frequency of fourteen to twenty-four cycles per second. Cf. ALPHA 3 f.

1948 R. P. AHLQUIST in *Amer. Jrnl. 'the better part of me' Shaks.; 'meæ partem animæ,' 'animæ dimidium meæ' Horace; 'animæ partem...nostræ majorem' Statius); esp. (after Sidney) used for 'my husband' or 'wife'; now, jocularly appropriated to the latter. Formerly also applied to the soul, as the better part of man.

In the idiomatic *I, we, you, he*, etc. *had better*, the original construction was *me, us*, etc. *were betere* (or *bet*) = it would be more advantageous for me, etc. (Cf. *me is betere*, etc. in 4.) The dat. pronoun was subsequently changed into the nominative, *I, we, were better* (perh. because in sbs. the two cases were no longer distinguished). Finally this was given up for the current *I had better* = I should have or hold it better, to do, etc. (Mr. F. Hall has shown that in these changes, *better* followed in the main the analogy of *liefer* and *rather*.) See HAVE. ***you'd better believe***: you may be assured. *colloq.* (orig. *U.S.*).

between (bɪt'wi:n), *prep.* and *adv.* Forms: *α.* 1 bi-, betweonunı, -an, -twinum, -an, -twynum, -an, 2–3 bitweone(n, -twene(n, bitwine, 3 bitweounen, 3–4 bituene, 4 bituine, bytwyne, betwene. *β.* 1 bi-, betwion, -tuien, bitwien, -twen, -twin, betweon, 2 bitweon, -twon, 2–3 bitwien, 3–4 bitwen, -tuen, (bitwhen, beþwen). *α. β.* (4–5 betweyn(e), 4–6 bi-, betwen(e, (5 bytwyen, betwyn), 5–7 betweene, 6– between. [The modern *between* combines two earlier forms: *α.* OE. *bi-, betwéonum*, etc., ME. *bitwenen, -twene*; *β.* OE. *bi-, betwéon*, etc., ME. *bitwēn*; see BE-. In *betwéonum*, Mercian *betwínum*, the second element represents an original OE. dative **twîhnum, *tweohnum*. In *betwéon* (only a northern form, Rushworth Gosp. *bi-, betwion, betweon*, Lindisf. *bi-, betuien, bitwén*, Durh. Ritual *bitwien, -twén, -twín*), the second element points back, according to Sievers, through earlier **twîhen, *twîhon*, to an orig. OE. acc. *twîhn* (cf. *bituichn* in Erfurt Gloss.). These, **twîhnum, *twîhn*, answer respectively to Goth. *tweihnaim* dat. pl., and *tweihna* acc. pl. neuter, of the distributive numeral *tweih-nai* 'two each', a derivative of *twa* TWO *sb.* (= L. *bī-nī*, for **dvī-nī* 'two each'), which appears also, but with the simple sense of 'two' (nom. masc.), in OS. and OFris. *twêne*, OHG., MHG. *zwêne* (early mod.G. *zween*). *Betwéonum*, later *betwéonan*, gave the prevailing ME. form *bitwenen*, reduced before a consonant, and at length generally, to *bitwene*; *bitwen* was mostly northern. But after 1400, when final *-e* became mute, and was omitted in writing, or retained only as a sign of a preceding long vowel, both forms necessarily coalesced in *betwene* (= betwēn), whence mod. *between*. In OE. the original construction was *bi sæm twéonum*, lit. 'by seas twain'; thence through constructions like *frið freondum bi twéon* 'peace friends between,' *bi twéonum, bi twéon* coalesced into prepositions. (Cf. the history of *to(us)-ward, toward, toward.*)

Intimately related to *between*, alike in their elements, and in the process by which these coalesced, are its synonyms BETWIXT, in ME. *betwix*, and † BETWIXEN, † BITWIH, † BITWIHEN, † BITWEIES. *Bitwih* was actually, in its origin, a doublet of OE. *betwéon*, and *betwihen* an expansion of that, on the analogy of *betweonen*. *Betwixen* and *betwix* were a parallel pair, formed on the OTeut. adj. *twiski-* 'two-fold'. (See Sievers *Misc. zur Ags. Gram.* §329.) *Bitwih* died *a* **1100**, *bitwihen a* **1300**, *betwixen a* **1500** ; *betwixt* is now archaic, *between* is the living word.]

V. 19. In all senses, *between* has been, from its earliest appearance, extended to more than two. In OE. and ME. it was so extended in sense 1, in which AMONG is now considered better. It is still the only word available to express the relation of a thing to many surrounding things severally and individually, *among* expressing a relation to them collectively and vaguely: we should not say 'the space lying among the three points,' or 'a treaty among three powers,' or 'the choice lies among the three candidates in the select list,' or 'to insert a needle among the closed petals of a flower.'

Much more common in OE. than the preceding. In ME. *betwix* seems to have been more northern, *betwixen, betwixe,*

more southern; in the 15th c. the loss of the final syllable of the latter finally levelled both as *betwix*. Already in OE., there appeared occasional instances of *betwuxt*, *-twyxt*, with a *-t*, either phonetic or analogical, but having no significance. This was also rare in ME., but after 1500 became the regular form, except in the north, which retained *betwix*, in 18th c. Sc. *betwish*, *betweesh*; cf. G. *zwischen*. (ME. had occasionally *bitwixte*, prob. a confusion between *bitwixt* and *bitwixe*.) There is a late shortened form *'twixt*.]

bevy ('bɛvɪ). Forms: 5 bevey, beuye, beue, 5–7 beuy, 6 beve, (bevvy), 6–7 beavie, beauie, beuie, bevie, 7–9 beavy, 5– bevy. [Derivation and early history unknown; ME. *bevey*, *beue* answers in form to OF. *bevee*, *buvee* 'drink, drinking' (in mod.F., a drink of water thickened with meal for beasts). This seems to correspond, with difference of conjugation (*bevée:— *bevāta*), to It. *bevuta* 'drinking-bout, a draught'; cf. also *beva* 'drink, liquor, potion, drench' (Baretti) with *beva* ' a beavie' in Florio. To explain the Eng. sense, it has been conjectured that *bevy* may have passed from the sense of 'drinking-bout' to 'drinking-party,' and to 'party' or 'company' generally: but of this there is no known evidence. These old names for companies of men and animals are however very fantastical and far-fetched, as may be seen in the first three works quoted.]

bewape, variant of BEWHAPE *v. Obs.*

beware (bɪ'weə(r)), *v.*¹ Forms: 2 ben war, 3–6 be war, be-war, 3–7 bewar, 3–5 be-warr, 5 by-war, 5–6 be ware, 6 bewarre, be wayre, 6– beware. [The origin of this is involved: 1. OE. had a trans. vb. *warian* 'to guard, take care or charge of,' with a compound *bewarian* 'to defend.' The latter is not certainly found in ME. (where it would have been *bewaren*); the former survived as WARE, common till 1500 with a dative refl. const., esp. in the imperative *ware thee!* 'cave tibi, take care of thyself, be on your guard, beware!'; and has been retained down to the present day in the simple imperative *ware!*, as 'Ware holes!' (although in this form it has often since 1600 been mistaken for a contraction of *beware!* or an interjectional use of the adjective). 2. OE. had also an adj. *wær* 'cautus, cautious, on one's guard,' which survived in ME. as *war*, *ware*, common in the phrase *to be ware* 'to be on one's guard,' of which the imperative *be ware!* was practically = *ware thee!* aforesaid. 3. From this equivalence of meaning, *be ware* early began to be treated in some respects as a single word, viz. as a compound of the vb. *ware*, thus stepping into the place of the OE. *bewarian.* As early as 1300 we find it written as one word, and even with *by* as the prefix, and in 14–15th c. it often followed the verbal constructions of the simple *ware*, even to taking a direct object, as in 'beware that train' (*c* 1500 in 1 e). But on the other hand it was used only in those parts of the vb. where *be* is found, viz. the imper., infin., and pres. subj. (the indic. being *I am ware, thou art ware*, etc.). After 1600, the verbal aspect so far prevailed that the inflexions *bewares*, *bewared*, *bewaring*, were used by good writers; but these have again been discarded, and *beware* is now used only where *be ware* would be a possible construction, viz. in the imper. (chiefly), the infin., and pres. subj. (rarely). The full evidence of these statements will be found under WARE: the following quotations show the relations of *to be ware, to ware oneself, ware thee, ware to thee, be ware to thee, beware thee, beware thyself*, before 1500.

bi, ME. variant of BY, a town.

bi, freq. ME. spelling of BY *prep.*, *adv.* (*a.*, *sb.*[1]): the same as next.

bi- *pref.*[1], the early OE., and the ordinary ME., form of the prefix BE-; under which spelling see most of the words. Those alone are left under BI-, which did not survive long enough to be spelt with *be-*.

bi- *pref.*[2], a. L. *bi-* (earlier *dui-*, cogn. with Gr. δι-, Skr. *dvi-*) 'twice, doubly, having two, two-,' which is in Latin a prefix of adjs., occas. of sbs., rarely of vbs. (e.g. *bipertīre*). The earliest Latin adjs. of this type are formed by simply prefixing *bi-* either to adj.- (and verb-) stems, as *bifer*, *bifidus*, *bijugus*, *bisonus*, or to sb.- (and adj.-) stems, as *bicolor*, *biceps*, *bifrons*, *bifurcus*, *bigener*; later in all probability, and more evidently mere compounds, are those in which *bi-* is prefixed to an adj. with a thematic suffix, as *bicorniger*, *bicubitālis*, *bilongus*, *bipatens*, and these are occas. participial in form, as *bicamerātus*, *biformātus*. The Latin sbs., ending usually in *-ium*, are formed on the prec. adjs., or possible ones of corresponding type, as *biennium* a space of two years, *biennis* lasting two years, *biclīnium*, **biclīnus*.

The prefix entered Eng. in composition, e.g. in *bigam* (= med.L. *bigamus*), found *c* 1300, *bicorne*, *c* 1420; *bifront*, *biforked* occur late in 16th c.; and from the 17th c. onward, by a wide extension of the Latin analogy, especially in its later phases, *bi-* has been prefixed to any adj. conveniently indicating the thing or quality which is to be described as doubled or occurring twice, principally to those of Latin etymology, as in *biangular*, *bicavitary*, *bicentral*, *bivaulted*, *bivoluminous*, but also to others as *birainy*, *biweekly*. In modern scientific terminology, adjs. in *-ate*, *-ated* are most frequently employed, as *biauriculate*, *bicarinate*, *bilamellate*, *bipinnate*, *biunguiculate*, *bimaculated*; and the attrib. use of sbs. as adjs. tends to such modern forms as *bichord*, *biwhirl*. (See also the form BIN-.)

Bi- is therefore used in Eng. to form:—

I. Adjectives, with the sense:—

1. Having or furnished with two —, two-—, as **bi-angular**, **-ate**, **-ated**, **-ous**, having two angles; **bibracteate**, having two bracts; **bibracteolate**, having two small bracts; **bicallose**, **-ous**, having two callosities; †**bicapited**, **bicapitate**, having two heads, two-headed; **bicapsular**; **bicavitary**, having two cavities; **bicentral**; **bichord**, having two strings; **biciliate**, having two cilia or hairs; **bicoloured**, **bicolumnar**, **biconsonantal**; **bicorporal**, **-ate**, **-ated**, **-eal**, having two bodies; **bicristate**, having two crests; **bifanged**; **biglandular**, having two glands; **bimarginate**, **bimembral**, **bimuscular**; **binodal**, having two nodes; **binuclear**, having two nuclei; **bi-ovulate**, **bipetalous**; **biporose**, having or opening by two pores; **bipupillate**, having two pupil-like markings; **biradiate**, having two rays; **birainy**, having two rains or rainy seasons; **bispinous**, **bistipuled**; **bitentaculate**, having two tentacles; **bituberculate**, **-ated**, having two tubercles; **bivascular**, having two vessels; **bivaulted**; **bivoluminous**, consisting of two volumes; **biwhirl**.

Originally an adjective, as in Pr. *via biayssa* cross or oblique road; but early used as a sb. in French, so that the first quotable example in Eng. is of the subst. use. 2. a. A term at bowls, applied alike to: The construction or form of the bowl imparting an oblique motion, the oblique line in which it runs, and the kind of impetus given to cause it to run obliquely. Thus a bowl is said 'to have a wide or narrow bias,' 'to run with a great' or 'little bias'; the player 'gives it more' or 'less bias' in throwing it.

It is difficult to decide in which sense exactly *bias* was here first used. A priori we think of the oblique line of motion: this is favoured also by the quotations under C. and BIAS-WISE; yet early quotations here point rather to the oblique one-sided structure or shape of the bowl. Formerly bias was given by loading the bowls on one side with lead, and this itself was sometimes called the *bias*; they are now made of very heavy wood, teak or ebony, and the bias given entirely by their shape, which is that of a sphere slightly flattened on one side and protuberant on the other, as if composed of the halves of an oblate and a prolate spheroid.

Bible ('baɪb(ə)l). Forms: 3-4 bibul, 4 bibel, 4-6 bibil(l, 5 bybulle, bybylle, 5-6 byble, 6 bybill, bybul, 4- bible. [a. F. *bible*, 13th c. (= Pr. *bibla*, Sp. and Pg. *biblia*, It. *bibbia*; whence also Ger. *bibel*, Du. *bijbel*, all fem.):—late L. *biblia* fem. sing., for earlier *biblia* neut. pl., the Scriptures, a. Gr. τὰ βιβλία, lit. 'the books,' in later Christian writers *spec.* 'the canonical books, the Scriptures.'

The Gr. βιβλία was pl. of βιβλίον, dim. of βίβλος (1. the inner bark of the papyrus, 'paper'; 2. a paper, scroll, roll, or book), which had ceased to have a diminutive sense, and was the ordinary word for 'book,' whether as a distinct treatise, or as a subdivision of a treatise, before its application to the Jewish and Christian Scriptures. In reference to the former, see τὰ βιβλία τὰ ἅγια 'the holy books,' in *1 Macc.* xii. 9: in Clemens Alex. probably, and Origen (*in Joannem* v. iv., ed. Lomm. I. 168) *c* 223, certainly, τὰ βιβλία include the N. Test. books. In Latin, the first appearance of *biblia* is not ascertained. Jerome uses *bibliothēca* for the Scriptures, and this name continued in literary use for several centuries. Of *biblia*, Becker, *Catal. Biblioth. Antiq.* 42, has a 9th c. example (see also those under sense 1 below); but the evidence of the Romanic langs. shows that *biblia* must have been the popular name, and have been treated as a fem. sing., much earlier than this. The common change of a Lat. neuter pl. into a fem. sing. in *-a* (as in *arma, battalia, folia, gaudia, gesta, opera*, etc.) was in the case of *biblia* facilitated by the habit of regarding the Scriptures as one work. In OE. *biblioþéce* alone occurs; in Anglo-Latin *biblia* and *bibliothēca* interchange in the 11th c. catalogue of the library of Lindisfarne; in the 13th c. catalogue of the Durham books only *biblia* occurs.]

[*Bicched* appears rather early to be certainly referable to BITCH in an opprobrious sense, from which moreover the formation is not easily explained (for *shrewed* there was a verb to *shrew.*) The conjecture has been offered that it was a contracted form of ME. *biwicced* 'bewitched'; but for this no evidence or analogy has been found. In *bicched bones* applied to dice, some have suggested a corruption of Du. *bikkel* 'knuckle-bone, astragalus, cockal, bone-plaything, dice, marbles,' Ger. *bickel* 'ankle, ankle-bone, astragalus, die, dice'; this is possible, but would suppose an Eng. series **bikkel, *bicchel, bicche, bicched* bone, of which the most important links are neither represented nor accounted for, and it would only show assimilation of **bikkel* to the opprobrious *bicched,* leaving the latter unexplained. That *bicched bone* could be for a Du. **bikked been* 'bone picked with holes or pips,' is highly improbable: moreover, this would not connect the expression with Du. *bikkel,* since the latter (whether or not connected with *bikkel* a pickaxe, *bikken* to pick, or notch) certainly did not mean 'bone picked with holes,' but was a name of the ankle, and of the astragalus or knuckle-bone used in play, long before it passed over to dice. bid (bɪd), *v. str.* Pa. t. bad, bade, (bæd), bid. Pa. pple. bidden, bid. Here there are combined two originally distinct verbs; viz.

I. *béodan*; *beden, bede*. Forms: 1 béodan, 2-3 beoden, 3-5 beden, 3-6 bede, 4-5 beede, 7 *dial.* bede. *Pa. t. sing.* 1 béad, 2-3 bead, 2-4 bed, 3-4 bedd, 4-5 bede; also 3-6 bod, 4-6 bode. *pl.* 1 budon, 2-3 buden; also 3-4 bedde(n, 4 bede, beode, 5 beede; also 3-4 boden, 5-6 bode. *Pa. pple.* 1-6 boden, 4 -in, -un, 4-5 -yn, bode, 5 bodden, -yn, 6 bouden, bod, 9 *dial.* bodden, *Sc.* budden.

II. *biddan*; *bidden, bidde*; *bid.* Forms: 1 biddan, 2-5 bidden, (2-3 biden, 3 bedden), 3-6 bidde, 4-6 bydde, (4 bedde, bide), 4-5 bidd, 4-6 byd, (5 byde), 4- bid. *Pa. t. sing.* 1 bæd, 2-9 bad, 3-5 badd, 4 baad, 4-6 badde, (6 *Sc.* bald), 4- bade; also 3-6 bed, 4 bedd, 5 bede, *Sc.* baide; also 6 bidde, bydd, 7-9 bid. *pl.* 1 bǽdon, 2-3 beden, 3-5 bede; also 3 badden, 4-5 baden, 4-9 bad, bade; also 6-9 bid. *Pa. pple.* 1-5 beden, 3-5 -in, -yn, (y)bede, 4-5 bedun, 4 bedd; 3- bidden, (4 -in, 5 bed, byden, 6 bad), 7-9 bid.

[I. OE. *béodan, béad, budon, boden*, = OS. *biodan* (MDu. and Du. *bieden*), OHG. *biotan* (MHG. and mod.G. *bieten*), ON. *bioða*, Goth. *biudan* (pa. t. *bauþ, budum*, pple. *budans*):—OTeut. **beudan* 'to stretch out, reach out, offer, present,' hence 'to communicate, inform, announce, proclaim, command'; pre-Teutonic **bheudh-*, cogn. with Skr. *budh* to present, and perh. with Gr. *πυθ-* (for *φυθ-*) in *πυθέσθαι* 'to inform oneself.' From the pa. pple. *boden* was derived the sb. *boda* messenger, whence the vb. *bodian* to BODE, announce. The normal ME. forms were *bēde(n*, pa. t. *bead, bēd, beed*, pl. *buden*, pa. pple. *boden*. But by form-levelling, the pa. t. had also pl. *bēden, bēd(e* from the sing.; and later also *bod(e*, by assimilation to the pa. pple.

II. OE. *biddan, bæd, bǽdum, beden*, = OS. *biddian* (MDu. and Du. *bidden*), OHG. and mod.G. *bitten*, ON. *biðja*, Goth. *bidjan* (pa. t. *baþ, bêdum*, pple. *bidans*):—OTeut. **bidjan*, assigned to a pre-Teutonic **bhedh-* 'to press' (cf. Skr. *bâdhate* to press), whence the senses 'to ask pressingly, beg, pray, require, demand, command.' (Osthoff would connect *bidjan* with Gr. *πείθω*.) The normal ME. forms were *bidde(n*, pa. t. *bad*, pl. *beaden, bede(n*, pa. pple. *beden*. By form-levelling the pa. t. had also occasionally sing. *bead, bēd, beed*, and at length pl. *baden, bade, bad*; and the pa. pple. became *bidden*, whence also a later pa. t. *bid.*

III. Thus the sense 'command' had been developed in both verbs already in OE. The past tenses were further confused in form in ME. The result was the frequent substitution of the forms of one verb for the other, in other senses also, and their total confusion after 1400–1500. As a whole, the forms of *biddan, bid* are those which survive in literary Eng., but in the dialects these are quite mixed, in such conjugations as *bid, bad* or *bod, bodden* or *budden*. Senses survive from both verbs, though mostly archaic, or in certain unanalysed phrases, as to 'bid farewell,' 'bid a truce,' 'bid fair'; the chief modern use is that of 'bid at an auction,' 'bid for votes or support,' which belongs to *bede*. The senses of 'invite' and 'order' are in every-day use in the north, but archaic in southern speech, where 'bid him do it' is regularly made 'tell him to do it.' Particular forms of the pa. t. and pa. pple. are preferred with particular senses.]

I. Senses originating from OE. *béodan*, ME. *bede*, (but taking eventually the form *bid*).

The *bede* quotations are marked α, the *bid* quotations β.

6. *bidding of beads*, *beads-bidding*; *bidding of prayers*, *bidding prayer*. As to these expressions there has been a series of curious misapprehensions. The original meaning down to the Reformation was 'praying of prayers,' i.e. saying of prayers, praying; cf. BID *v.* 7 e. From an early date in the Christian church, it was the custom to request the prayers of the faithful in behalf of certain persons and things; and in the 16th c., in England, forms of allocution or direction to the congregation, telling them whom and what to remember in 'bidding their beads' or 'prayers' were authoritatively put forth. As *bid* in the sense of 'pray' was now becoming obsolete, the meaning of the expression was forgotten after the Reformation, and *bid* taken in the sense of 'order, direct,' so that in the reign of Elizabeth the 'bidding of prayers' was applied to the allocution itself, as if = 'the directing or injoining of prayers.' With the later use of the vbl. sb. as a gerund directly governing an object, we have in the 17th c. 'the form of bidding prayers' or 'prayer' (= *precationem hortandi*); and later still, a misunderstanding of the grammatical construction in this phrase has given rise to the vulgar error of calling this exhortation to the people (in which 'concionatores populum hortabuntur ut secum in precibus concurrat' Sparrow *Collect. Articles*, 1671) 'the bidding-prayer,' as if it were itself a kind of prayer qualified by the attribute 'bidding.'

[In OF. *Bigot* appears first in the romance of *Girart de Roussillon* (12th c.) as the proper name of some people, apparently of the south of Gaul. Hence already in the 17th c. it was suggested by Caseneuve, that it might be an OF. form of *Wisigothus*, Visigoth; the relations between the Visigoths of Toulouse who were Arians, and the Franks who were Catholics, being such as readily to attach to the name of the former the connotation of 'detestable foreigner' or 'foreign heretic.' But modern Romanic scholars find phonetic difficulties, besides that there is no evidence that the name *Wisigothi* was preserved in the vulgar tongue. Slender support to some connexion with the Goths is suggested by the med.L. form *Bigothi* (Du Cange). Whether the Sp. *bigote*, moustache, is in any way connected, cannot be decided. According to Wace *bigoz*, *bigos* was applied opprobriously by the French to the Normans, which shows that the word had then acquired some connotative force; the legend that it originated in the refusal of Hrolf or Rollo to kiss the foot of Charles the Simple, when, in the words of the 12th c. chronicler, 'lingua Anglica (!!!) respondit *Ne se, bi got*, quod interpretatur *Ne per Deum*' (No by God!), is absurdly incongruous with facts. The opprobrious sense in Wace was certainly not that of 'superstitious' or 'hypocrite,' as in later F. and Eng.; materials to show how the latter was developed are wanting, but there is evidence to show that the feminine *bigote* was subsequently applied in opprobrium to the *Beguines* (see *Beguta, Bigutta*, in Du Cange): our first quotation identifies *bigot* with *bigin* or *beguine*. In early times the word became a Norman family name as in Roger Bigod earl of Norfolk.]

bilk (bɪlk), *sb.* [Of uncertain origin; nor can it be determined whether the sb. or the vb. was first in use. The verb was at first a technical term in the game of Cribbage, where it interchanged with *balk*; hence a conjecture that it may have originated in a mincing pronunciation of the latter. Blount's assertion that the word is Arabic is altogether erroneous; and the derivation 'from Mœso-Goth. *bi-laikan* to mock, to deride,' given in some dicts., belongs to a pre-scientific age.]

billion ('bɪljən). [a. F. *billion,* purposely formed in 16th c. to denote the second power of a MILLION (by substituting BI- *pref.*[2] for the initial letters), *trillion* and *quadrillion* being similarly formed to denote its 3rd and 4th powers. The name appears not to have been adopted in Eng. before the end of the 17th c.: see quot. from Locke. Subsequently the application of the word was changed by French arithmeticians, figures being divided in numeration into groups of threes, instead of sixes, so that F. *billion, trillion,* denoted not the second and third powers of a million, but a thousand millions and a thousand thousand millions. In the 19th century, the U.S. adopted the French convention, but Britain retained the original and etymological use (to which France reverted in 1948).

Since 1951 the U.S. value, a thousand millions, has been increasingly used in Britain, especially in technical writing and, more recently, in journalism; but the older sense 'a million millions' is still common.]

bin-, *pref.*, treated as a euphonic form of BI- *pref.*[2], used before vowels. TANSLEY in tr. *Raunkiaer's Life Forms of Plants* p. xiii, The 'biochore'..., originally Köppen's term and analogous to the climatological terms isotherm and isohyet, is the line passing through all the areas whose floras show the same percentage number of a characteristic life-form: biochores can only be determined by the analysis of a large number of adjacent local floras. **1937** ALLEE & SCHMIDT tr. *Hesse's Ecol. 1883 H. J. RICE tr. *Möbius' Oyster & Oyster Culture* in *Rep. U.S. Comm. Fish & Fisheries 1880* VIII. 723 Science possesses, as yet, no word..for a community where the sum of species and individuals..have, by means of transmission, continued in possession of a certain definite territory. I propose the word *Biocœnosis* for such a community. Any change in any of the relative factors of a biocönose produces changes in other factors of the same. **1925** I. W. BAILEY in *Bot. Gaz.* LXXX. 93 (*title*) The 'Spruce Budworm' Biocoenose. **1957** *Encycl. Brit.* III. 607/2 The idea of the animal community and of the fully integrated biological community or biocoenosis is largely the result of the study of shallow water populations in the sea. *Ibid.* VII. 917/2 Such assemblages..have been called biocoenoses, if the interrelations are especially closely knit, and they are known generally as communities. **1957** *Sci. News* XLIII. 71 A fossil 'community'..is seldom identical with the original biocoenose (or life community).

Hence **biocœ'nology**, the study of biocœnosis; **biocœ'no tic** *a.*, of or pertaining to biocœnosis.

1927 *Biol. Abstr.* 593/1 Small associations should be known as biocöenotic complexes. **1931** R. N. College Physicians & Surgeons of Canada* X. 130/1 Because of its strong component of moral and religious values, bioethics is a delicate and difficult subject. **1978** *Observer* 30 July 9/3 The first successful completion of a pregnancy begun in the laboratory does raise some interesting issues. They fall into that area of debate which the Americans call..'bio-ethics'. **1984** *New Scientist* 9 Aug. 34/1 A professional philosopher with a particular interest in bioethics.

Hence **bio'ethical** *a.*; **bioethicist** (-'ɛθɪsɪst), an expert in or student of bioethics.

1973 *Hastings Center Studies* I. 1. 73/1 The discipline of bioethics should be so designed..that it will directly..serve those physicians and biologists whose position demands that they make the practical decisions. This requires, ideally, a number of ingredients as part of the training..of the bioethicist. **1974** *Jrnl. Amer. Med. Assoc.* 8 July 177 Maintaining a critical tension between the individual and the bioethical dimensions. **1977** *Lancet* 13 Aug. 347/2 It seems that in the United States, notwithstanding legislative attempts to settle bioethical issues, the courts will have the final say. **1978** *Brit. 1960 J. E. KETO in *Proc. Nat. Aeronaut. Electronics Conference* 218 The title of this session is Bionics. This is a new term referring to a relatively new but rapidly expanding area of activity—the study of systems which function after the manner of or in a manner characteristic of or resembling living systems. **1962** *New Scientist* 29 Mar. 737/3 Much of the emphasis in 'bionics'—study of animals by engineers in an attempt to learn 'dodges' from nature—has been on sense organs and nervous systems. **1966** *Ibid.* 10 Mar. 626/1 Engineering bionics is a relatively new science aimed at making machines which behave like living systems.

biophor ('baɪəfɔ:(r)). *Biol.* Also -phore. [G. *biophor*, f. Gr. *βίος* life + *-φορος* -bearing.] In Weismann's theory of heredity: a supposed ultimate unit of living protoplasm.

1893 PARKER & RÖNNFELDT tr. *Weismann's Germ-Plasm* I. i. 40 We have to imagine that..protoplasm..consists of groups of molecules, each of which is composed of different kinds of chemical molecules. I shall call these units the 'bearers of vitality' ('Lebensträger') or 'biophors', because they are the smallest units which exhibit the primary vital forces, viz. assimilation and metabolism, growth, and multiplication by fission. **1894** *Nat. Sci.* Sept. 185 His [*sc.* Weismann's] germ-plasm is made up of primary units, the biophores, which are built up into determinants, a determinant existing for each independently varying cell or group of cells in the adult organism. **1959** A. HUGHES *Hist. Cytol.* iv. 83 His [*sc.* Weismann's] ideas on development.. are as outdated as the peculiar terminology in which the postulated structure of the germ-plasm was expressed. The 'Biophor' has long been extinct, and the 'Id' has acquired a new meaning in another science.

bio'physics. The science dealing with the mechanical and electrical properties of the parts of living organisms. Hence **bio'physical** *a.*, of or pertaining to biophysics; **bio'physicist,** one who is versed in biophysics.

1892 K. PEARSON *Gram. Sci.* 470 This branch of science which endeavours to show that the facts of Biology.. constitute particular cases of general physical laws has been termed *Ætiology*. It would perhaps be better to call it *Biophysics*. **1913** L. J. HENDERSON *Fitness Environm.* 310 While biophysicists like Professor Schäfer follow Spencer in assuming a gradual evolution of the organic from the inorganic, biochemists are more than ever unable to perceive how such a process is possible. **1913** *Science Progress* VIII. 319 The bio-physical and bio-chemical conditions underlying normal physiological processes in the organ of mind. **1926** *Encycl. bioplasm ('baɪəʊplæzm). *Biol.* [f. BIO- + Gr. *πλάσμα* a thing moulded.] Prof. Beale's term for: The germinal matter of all living beings; living 'protoplasm.'

1872 BEALE *Bioplasm* i. §14 As the germ of every living thing consists of matter having the wonderful properties

already mentioned, I have called it germinal matter; but the most convenient and least objectionable name for it is living plasma or bioplasm. **1882** *Spectator* 30 Sept. 1251 A bit of bioplasm, or a minute parasitical organism.

Hence **bio'plasmic** *a.*

1872 NICHOLSON *Biol.* 71 Bioplasmic matter is colourless, transparent, and apparently wholly destitute of structure. **1883** WRIGHT *Dogm. Sceptic.* 12 Bioplasmic theories.

biopoesis (baɪəʊpəʊ'iːsɪs). [f. BIO- + Gr. *ποίησις* making.] The (hypothetical) origination or evolution of living or lifelike structures from lifeless matter; abiogenesis. Hence **bio'poeic** *a.*, pertaining to, causing, or resulting from biopoesis.

1953 N. W. PIRIE in *Discovery* Aug. 239/1 Biopoesis (the cognate adjective is biopoeic) seems a more suitable word than Huxley's *abiogenesis* for the making of life *de novo*. Words ending in *genesis* carry a sense of generation as in animals; the making of like by like. *Ibid.*, Perhaps..there is no need to postulate any special biopoeic agency at all. **1967** J. D. BERNAL *Orig. Life* viii. 137 The modern view of biopoesis includes elements both of deterministic character and of the older teleological character.

biopsy ('baɪɒpsɪ, baɪ'ɒpsɪ). [ad. F. *biopsie* (Besnier), f. Gr. *βίος* life + *ὄψις* sight. After NECROPSY.] Examination of tissue, etc., removed from the living body; also, the removal of such tissue.

1895 E. BESNIER in J. J. Pringle *Pict. Atlas Skin Dis.* 88 Clinical teaching will now find in a 'biopsy' a valuable means of confirming or invalidating a dubious diagnosis. **1902** *Brit. Jrnl. 1853 DE MORGAN *Camb. Philos. Trans.* IX. IV. 2 It is desirable to invent single words to stand for the phrases 'of the first order,' 'of the second order,' etc. I propose *primordinal, biordinal*, etc. The word *differential* may be dispensed with, since these adjectives are understood to apply to differential equations only.

B. *sb.* A linear differential equation of the second order: see ORDINAL.

1881 SIR J. COCKLE in *Athenæum* 268 [Paper entitled] 'Supplement on Binomial Biordinals.'

biorhythm ('baɪəʊrɪð(ə)m). [f. BIO- + RHYTHM *sb.*] An endogenous cyclic variation in some aspect of an organism's bodily functioning, as the daily cycle of sleeping and waking, or the annual cycle of dormancy and activity in some animals; *spec.* each of three alleged cycles of different periods involving a person's physical, emotional, and intellectual activity, as used to explain or predict behaviour.

1960 *New Scientist* 29 Sept. 849/2 Hibernation is not simple sleep, nor is it continuous sleep. It proceeds in a biorhythm of the same sort as causes Man to sleep and waken at regular intervals. **1968** *Science Year World Bk. Science Ann.* 115 Symptoms of biorhythm upset, known popularly as the jet syndrome, are experienced by jet airplane travelers who fly through several time zones in 12 hours or less. **1972** MANAKA & URQUHART *Layman's Guide Acupuncture* (1977) I. 77 The concept of biorhythm, of an internal 'biological clock' that regulates the organism's functioning in relation to both solar and lunar time measurement, is now an accepted part of Western physiology. **1976** *National Observer* (U.S.) 24 Jan. 9/2 The biorhythms theory..holds that a person's three key cycles begin running in a regular pattern at the moment of birth. 2. Any feathered vertebrate animal: a member of the second class (*Aves*) of the great Vertebrate group, the species of which are most nearly allied to the Reptiles, but distinguished by their warm blood, feathers, and adaptation of the fore limbs as wings, with which most species fly in the air.

Now used generically in place of the older name FOWL, which has become specialized for certain kinds of poultry, and by sportsmen for wild ducks and wild geese. In this sense, *bird*, ME. *brid*, is found in the south *c* 1300; it appears to have been extended from the young of birds (sense 1) at first to the smaller kinds, Chaucer's 'smale foules.' So late as a century ago, Dr. Johnson says (1755–73) 'In common talk *fowl* is used for the larger, and *bird* for the smaller kind of feathered animals'; and this distinction still obtains to some extent dialectally. (In Scotland *large birds* e.g. hawks, herons, are ' fowls,' *small birds*, as well as chickens, are 'birds.') A further process of specialization (cf. the histories of *fowl*, *deer*, *beast*), seems still to be in progress in regard to *bird*, as witness its technical use by game-preservers (sense 3).

1. A spiritual superintendent or overseer in the Christian Church.

a. Used in the New Testament versions to render the Gr. word *ἐπίσκοπος*, applied to certain officers in early Christian churches, either as a descriptive term, or as their actual title. In Wyclif, the Rhemish, and Revised Versions, the Gr. word is so rendered in every instance; but in the other versions from Tindale to 1611, it is in Acts xx. 28 (where applied to the *πρεσβύτεροι* or 'elders' of Ephesus) rendered 'overseers.' Also applied to Christ, as descriptive of his office. (Sometimes applied by those who do not recognize the episcopal order, to their pastor or chief elder, but only as a descriptive term, or as identifying his office with that of the New Testament 'bishop.')

1382 WYCLIF *Acts* xx. 28 Al the folk in which the Hooly Gost sette 30u bischopis. 1868 LIGHTFOOT *Philippians* 93 It is a fact now generally recognized by theologians of all shades of opinion, that in the language of the New Testament the same offieer in the Church is called indifferently 'bishop' *ἐπίσκοπος* and 'elder' or 'presbyter' *πρεσβύτερος*.

b. *spec.* In the Eastern, Western, Anglican, and other churches of episcopal order: A clergyman consecrated for the spiritual government and direction of a 'diocese,' ranking beneath an archbishop (where these exist) and above the priests or presbyters, and deacons. (This is the sense in which the word passed with Christianity into all the Teutonic langs., and thus the earliest sense in English.)

bishop in partibus (*infidelium*) in R.C. Ch., one dignified with the title of a bishopric, whose district or diocese is in the possession of infidels or heretics; originally applied to those expelled from the Holy Land by the Saracens.

The Old English *wesend* having been long obsolete, the word has come back to us through Latin, in which guise it can hardly be looked upon as Eng. before the 17th c., and has become familiar only in connexion with the American Bison. It is in Minsheu, Coles, Phillips 1678–1706, and Kersey; but not in Cockeram, Blount, Bailey 1721–90, Johnson, nor Richardson 1836–55: it was added by Todd to Johnson, 1818. 'near-seeing, seeing (close) by,' has suggested that it was a corruption of *bíséonde*, f. *bi-*, BY + *séonde* seeing. Another suggestion is that the original form was *bíséne*, f. *bí-* pref. + (*ʒe*)*síene, -sýne, -séne* manifest, conspicuous, visible. See Skeat. The former explanation has various etymological difficulties; the latter appears to fail in the sense, since 'visible close by' is not = 'seeing only close at hand,' still less = 'blind.']

[In form, *bistre* comes near to a series of Teutonic words, ON. *bistr* angry, knitting one's brows, Sw., Da. *bister* angry, fierce, raging, grim, Du. *bijster* bewildered, LG. *biester* having lost one's way; also 'dark, dismal, gloomy' Flügel. Of these Franck takes the Flemish *bijstier* as apparently the most etymological form, and would refer it to an OTeut. **bi-stiuri* with the notion of 'deranged, disturbed, amazed.' If this be the derivation, these words can hardly be related to the Fr. *bistre*, as they might be if 'gloomy, dark' were the radical notion. Mr. H. Bradley compares OF. *behistre*, *beïstre*, var. of *besistre* bissextile, meaning, 1. the bissextile day in February, 2. unlucky event, disaster, calamity, 3. 'a horrible storm or tempest in the aire' (Cotgr.); whence the notions of 'dismal, gloomy, grim, raging, etc.' might be plausibly derived; but historical evidence as to connexion between the various words is wanting.]

As will be seen on comparing the next word, there were two OTeut. sbs. derived from this verb, of which the senses 'act of biting,' 'piece bitten off,' were not uniformly distinguished in the different langs. In OE., *bite* 'act of biting, bite,' and *bita* 'piece bitten off, morsel, bit,' were distinct, but both became *bite*, *bit* in ME., and both are now *bit*, so that they can be distinguished only by tracing the history of their senses. In the general sense the former is now represented by the later sb. BITE, but *bit* is retained in numerous specific uses, esp. that of the biting part of a tool.]

1948 C. E. SHANNON in *Bell Syst. Techn. Jrnl.* July 380 The choice of a logarithmic base corresponds to the choice of a unit for measuring information. If the base 2 is used the resulting units may be called binary digits, or more briefly *bits*, a word suggested by J. W. Tukey. 1952 *Sci. Amer.* Sept. 135/1 It is almost certain that 'bit' will become common parlance in the field of information, as 'horsepower' is in the motor field. 1957 *New Scientist* 9 May 14/1 One 'bit' is the smallest amount of data which can exist, and corresponds to the answer to a yes-or-no question. On this basis, a decimal numeral can be described with four bits and an alphabetic letter with five... Existing electronic computers can store, in their normal memories, up to about one million bits.

2. Special Comb.: **bit map**, a representation, e.g. of a computer memory, in which each item is represented by one bit; *spec.* a graphic display in which characters are formed by assigning to each individual pixel a bit value; so **bit-mapped** *ppl. a.*, employing or involving a bit map; **bit mapping** *vbl. sb.*, the use of a bit map.

1973 *Computing Surveys* June 112/1 In a *bit map scheme, a Boolean form of the matrix *M* is the basic indexing reference. Whenever a non-zero entry occurs in the sparse matrix, a 1 bit is placed in the bit-map. 1981 *High Technol.* Sept. 20 All have headend electronics that takes the input character stream and makes a 'bitmap', a point-by-point representation of a page. 1983 *Your Computer* (Austral.) June 94/2, I have included a program.. which when run will provide a bitmap of the specified disk. 1978 *Proc. Micro-Delcon* (Delaware Bay Microcomputer Conf.) 21/2 The system features a *bit-mapped display. 1983 *Electronics* 1 Dec. 139 High-performance bitmapped graphics. 1979 *Computer* Oct. 25/1 The RTBM—real-time *bit mapping —scan for the same parameters shows the detailed effect that the failure mechanism has on each memory cell. 1984 J. HILTON *Choosing & using your Home Computer* 265/1 'Bit-mapping'.. enables the programmer to control each individual pixel within a given area of the screen.

F. *bivouac*, *bivac*, generally said to have been introduced during the Thirty Years' War. It has with probability been referred to a dialectal (Swiss) Ger. *beiwacht*, according to Stalder, *Versuch eines Schweizerischen Idiotikon* (1812) II. 426, used in Aargau and Zürich to denote the patrol of citizens (*Schaarwache*) added (*beigegeben*) to assist the ordinary town watch by night at any time of special commotion. This remaining of a large body of men under arms all night explains the original sense of bivouac.]

blab (blæb), *sb.*[1] Forms: 4–7 blabbe, 6– blab. [The history of *blab* and *blabber*, and the question of their mutual relations, if any, is very obscure. *Blabbe* sb. 'chatterer' occurs in Chaucer *c* 1374, and is very common thenceforth; *blab* sb. 'chatter, loose talk' is in *Tale of Beryn* (*c* 1400), but has not been found elsewhere before the 16th c., when appears also *blab* vb. 'to chatter' (1535), followed in course by its agent noun *blabber*. But the vb. *blabber* is earlier than any of these; it occurs in *Piers Ploughman* (1362), and is (with its deriv. *blabberer*) very common in Wyclif; the facts thus forbid us to take *blabber* as a frequentative derivative of *blab* vb.; while no analogy exists for the formation of either (of the only two early words) *blabbe* sb., *blabber* vb., from the other. It would be hardly justifiable to assume *blabbe* to be a 14th c. abbreviation of *blabberer*. For forms akin to *blabber* in other langs. see that word. With *blabbe* we have to compare a sb. *labbe* 'revealer of secrets, blabber,' in Chaucer, and a vb. *labbe* of same age in P. Ploughman, with pple. *labbyng* 'blabbing, open-mouthed,' also in Chaucer, identical with ODu. *labben* to chatter 'garrire' (Stratm.). *Blabbe* might be a mixed form due to association of *labbe* and *blabber*; but may also be purely onomatopœic. Cf. BABBLE.]

black (blæk), *a.* Forms: 1 blæc (*def.* blace), 1–4 blac, 2–6 blake, 3–5 blak, 5 blaak(e, 4–7 blacke, 5– black. [OE. *blæc, blac* (def. *blace*) = OHG. *blah-, blach-* (in comb.); a word of difficult history. In OE., found also (as the metres show) with long vowel *blāce, blācan*, and thus confused with *blác* shining, white:—OTeut. **blaiko-* (see BLAKE), as is shown by the fact that the latter also occurs with short vowel, *blăc, blăcum*; in ME. the two words are often distinguishable only by the context, and sometimes not by that. (Cf. ¶7.) ON. *blakkr* is not an exact phonetic equivalent, but, if native, points to an OTeut. **blakko-* (for *blak'no*: see Kluge *Beitr.* ix. 162). Sievers suggests that the original Teutonic types were **'blǣkno-, *blak'ko-*, subsequently levelled to *blǣko-, blako-, blakko-*, giving the OE. and ON. words; in this case **blǣk-no-* might be pa. pple. of a vb. **blǣkan* to burn (cogn. w. Gr. φλέγειν), and the original sense 'burnt, scorched.' Cf. BLATCH, which points to an OTeut. **blakkjo-*, from *blakko-*. In Eng. *black* has quite displaced the original colour-word SWART, which remains in the other Teutonic languages.]
